

Innovation to Impact: How Universities Launch Ideas Out of the Lab and Into the World

Kim Rosenfield, J.D.
Director, Technology
Transfer Office
Dartmouth College

Have you ever wondered how scientific discoveries evolve from an idea into technologies that are widely used in society? Did you know that universities originated inventions from Google to 3D printers, from Gatorade to Warfarin? How did these innovations get from research labs to our everyday lives? The mission of the Technology Transfer Office (TTO) at Dartmouth is to transfer research out of the lab and into the world, from “bench to bedside.” Join us to hear about some of the groundbreaking inventions that have originated in our backyard, and get a behind-the-scenes look at this fascinating process!

Wednesday, December 4
Doors open at 5 PM
Presentation begins at 6 PM
Galligan's Pub

As always, advanced registration is necessary.
Participation in Science Pub requires an active AIL Membership.
